

## Times Microwave Systems and Times Fiber Communications

*... in cooperation with ADM Associates presents...*

- **Surge Protection and Grounding for Wireless Networks**
- **Integrating Fiber into RF Communications Systems**
- **Coaxial Cable Selection for Optimum Performance**

We are pleased to present a free technical workshop that will enhance your knowledge of coaxial cable applications, lightning protection techniques and fiber optic solutions.

Learn more by attending this no-cost workshop on  
**Wednesday, August 25th, 2010** from 8:45 a.m. to 2:30 p.m. (lunch provided).

**Hilton Garden Inn**  
**2631 Highwood Boulevard (I-24, exit 66)**  
**Smyrna, Tennessee 37167**  
**(615) 355-6262**

Learn the statistical parameters of a lightning event, proper grounding techniques and an overview of surge protection technologies. In addition, Times Fiber Communications will present the basics of RF fiber systems and the solutions available from Times Fiber.

The workshop will also provide an introduction of the new Times-Protect line of surge / lightning protection products. These innovative surge protection devices address applications throughout the entire RF frequency range up to and including 6 GHz.
