Times Microwave Systems announces its LP-BTR50 series of Lightning Protection Products for RF Communication Networks

Times Microwave Systems has introduced the new **LP-BTR50** series as part of its **Times-Protect™** line of innovative RF lightning and surge protection products. These unique devices address the protection of RF equipment for applications from 125 MHz through 1000 MHz. Among the most noteworthy features of the new **LP-BTR50** series of RF lightning protection products are:

- DC blocking technology
- Exceptional longevity
- Excellent multi-strike performance
- Outstanding S parameters over the operating frequency band
- Superior surge performance

About Times Microwave Systems

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
