# Times Microwave Systems announces new Lightning Protection Product Line for RF Communication Networks.

Times Microwave Systems has introduced its new *Times-Protect*<sup>™</sup> line of innovative RF lightning protection products. These unique surge protection devices address applications throughout the entire useful RF frequency range from DC with capability up to and including 6 GHz. Among the most noteworthy features available in the new *Times-Protect*<sup>™</sup> line of RF lightning protection products are:

- New DC blocking technology
- Unmatched passive intermodulation (PIM) performance
- Exceptional longevity
- Excellent multi-strike performance
- Outstanding S parameters over the operating frequency band
- Superior surge performance
- Weatherization to IP67 standard
- Available bi-directional designs
- Available DC Pass capability

Detailed product line information will be available in the first quarter of 2010.

## About Times Microwave Systems

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies.
