## Two New *Advantage*<sup>™</sup> Type N Male Right Angle Connectors for LMR<sup>®</sup>-195 and LMR<sup>®</sup>-240 cables now available from Times Microwave Systems

The Times *Advantage*<sup>™</sup> connector line has been extended to include several new type N male right angle connectors for LMR-400 and LMR-600 cables:

	<u>List Price/each</u>
<b>TC-195-NM-RA</b> type N solder pin male right angle (3190-2425)	\$12.00
<b>TC-240-NM-RA</b> type N solder pin male right angle (3190-2426)	\$12.00

All connectors feature:

- Combination hex/knurl coupling nut—allows tightening by hand or with a wrench
- Tri-metal plating instead of silver plating—eliminates tarnishing, while providing superior electrical performance
- Chamfered cable entry hole for ease of termination
- Ridged landing area on the aft end for better grip and sealing of the heat shrink boot—to provide improved strain relief and weather sealing
- Enhanced impedance matching to provide superior VSWR performance

*Advantage*<sup>™</sup> connectors are currently available for *LMR*<sup>®</sup> cables ranging from LMR-195 through LMR-600. *Advantage*<sup>™</sup> connectors include **EZ** (no-solder) and solder versions and both crimp and simple 2-piece clamp styles.

*LMR*<sup>®</sup> cables are low loss, flexible, non-kinking RF transmission line cables that utilize easy-to-install connectors and are suitable for use as antenna feeders, system jumpers and interconnects.

### **About Times Microwave Systems**

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
