Times-Protect Smart-Panel™ **from Times Microwave Systems**

Times Microwave Systems has introduced the ***Times-Protect Smart-Panel™***, the most revolutionary concept in shelter and base station entrance panels to ever come along. Intelligently designed to eliminate traditional entrance panel shortcomings and vastly improve the protection of expensive base station equipment, the ***Smart-Panel™*** is truly a product for 21st century needs.

The ***Smart-Panel™*** provides for highly desirable single point grounding while eliminating the expense and potential incorrect installation of external grounding kits. The ***Smart-Panel™*** design provides for bulkhead mounting of the surge protectors directly on the panel for superior surge performance. Also eliminated are the traditional internal lightning protector “trapeze” as well as the external copper master ground bar so there’s nothing to steal outside the shelter!

The ***Smart-Panel™*** is completely weatherized, accommodates any shelter wall thickness and is supplied with all the necessary installation hardware including an inside copper master ground bar and low inductance ground plate.

Constructed of powder-coated heavy duty aluminum, the ***Smart-Panel™*** is available in the following configurations:

***Times-Protect Smart-Panel™* Series:**

<u>Item</u>	<u>Configuration</u>	<u>List Price</u>
LP-SP-12N	12 port N hole	\$1,490.00
LP-SP-12D	12 port 716 DIN hole	\$1,490.00
LP-SP-24N	24 port N hole	\$1,980.00
LP-SP-24D	24 port 716 DIN hole	\$1,980.00

Custom designs are also available and all designs can also accommodate EWG, Cat 5 data, DC or Fiber entry ports.

About Times Microwave Systems

Times Microwave Systems has over 60 years experience in designing innovative, high-reliability, coaxial cables and assemblies for demanding interconnection problems. An engineering oriented organization, the company specializes in the design and manufacture of high performance flexible and semi-rigid coaxial cable, connectors, and cable assemblies for RF transmission from HF through microwave frequencies as well as surge arrestors for the protection of RF equipment.
